

# *Le Biberon Français*

**Marie and Jules, 2 months.\***

**You make little wonders ?**

**WE MAKE THEIR  
FEEDING BOTTLES**

**The team :**  
**Benjamin and Cédric.\***

*\* 100% of our photos come from real users.*

# A Family Story

*They measure only eighty centimeters, arms raised, but each baby alone fills three suitcases and two travelling bags. For this all-round champ, your baby, it was necessary to create a supreme bottle. An ingenious dad did it. By deciding to lighten your load, he set himself the task of creating a sublime and practical object. Challenge accepted and Le Biberon Français was born!*

# Let's go, Little Squad !

Committed father and passionate inventor, Benjamin Banoun is not one to sit around and wait. During a trip to the seaside with a trunk filled to the brim, and kids tightly seated between bags, he found that Odile, his wife, had devoted an entire XXL bag to baby bottles! A brilliant idea then occurred to him: he should reinvent the bottle and make, at the same time, a little more room in the minivan.

It was at this moment that the idea was born to combine, in the same range of feeding bottles, the best materials, the most perfect nipples and easy to use bottles with a trendy design. The idea was to offer all families reliable, aesthetic and recyclable products. "Impossible is not French" ! Baby bottles that are high-end and democratic, Le Biberon Français, entirely designed, conceived and made in France and using only the finest materials, was soon to see the light ....

## Growing Up

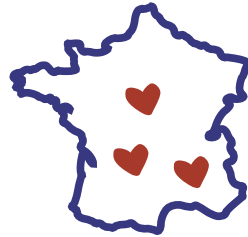

Our bottle is meant to grow with its small owner. Used by some parents from the first feed as a supplement to, or as a replacement for, breastfeeding, our bottle defines the privileged and unforgettable tender moments of infancy. Nestled in loving arms, fragile but determined, each baby will grow steadily, gaining strength. Very soon they will master their movements and will be able to grab hold of the feeding bottle themselves with their own tiny hands. A nourishing and reassuring object, the feeding bottle becomes the object of their first taste experiments and too soon will be colored with fruit juices, flavored milk and syrups of all kinds.

### *A revolutionary feeding bottle for little ones*

After a year of exciting research and development aimed at combining quality, comfort, aesthetics and ergonomics, Le Biberon Français was patented and quickly became the holy grail of bottles for stylish young parents.

# Liberty, Equality, Quality

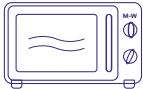

**Great safe products.**  
**100% Made In France.**

## The multi-stage feeding bottles

FRENCH  
PATENT

Great care has been paid to the design and the manufacturing process of our **unique feeding bottles**.

Our philosophy: no concessions made regarding any aspect of our feeding bottles: impeccable from conception until the day of recycling.

Our products are 100% made in France which guarantees not only their quality but also traceability.

Our bottles are made with copolyester which gives transparency, lightness and sturdiness and they are really durable.

**Our bottles are clean.**

**They remain so, and will not contaminate your baby's milk with millions of plastic microparticles.**

Our bottles seen under a microscope (SGS Image)

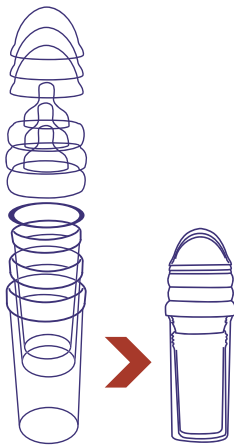

Bottles with polypropylene containers seen under the microscope (SGS image)

# 3 multi-stage feeding bottles with organic cotton transport pouch

- **The 360 ml-13 Oz bottle** is already provided with an adapter ring and a **nipple M**, recommended for children over 6 months. An additional adapter ring is also provided.
- **The 210 ml-7,5 Oz bottle** is supplied with a **nipple M**, recommended for children over 6 months.
- **The 210 ml -7,5 Oz bottle** is provided with a **nipple S**, suitable from the birth.
- In order that you may take your bottle everywhere you go, a **soft organic cotton** pouch is provided with this set.

SAVE  
SPACE  
X3

This Bottle is especially dedicated for older children and larger meals. You can combine it with the two other bottles.

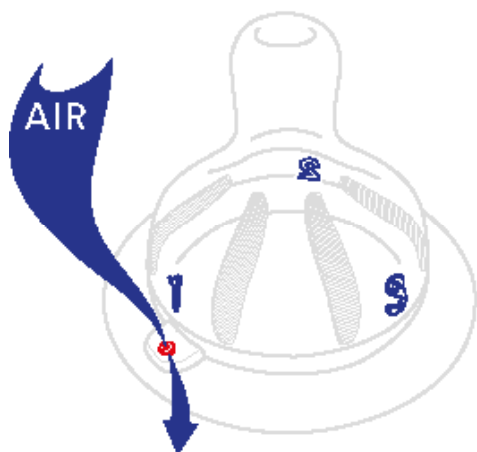

This feeding bottle is very convenient for babies of all ages. You can combine it with the 210ml- 7,5Oz bottle and the bigger one of 360ml - 13Oz. It is provided with a nipple Size M for children over 6 months old but you can adapt the S one for newborn babies.

This thin feeding bottle was designed specifically for new-born babies. It is provided with a nipple S, suitable from the birth, you can of course use it with the nipple size M whenever your child is ready.

# The ANTI-COLIC Valve

*The nipple is the key to a comfortable and pleasant feed. Thanks to the quality and technical specifications of our design, your baby will happily accept bottle feeding.*

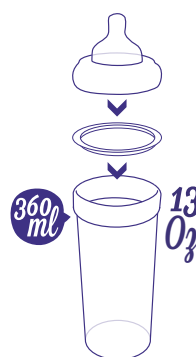

## HOW DOES THE ANTI-COLIC SYSTEM WORK?

When your baby drinks a bottle and empties it, depression is created in the bottle and this counters the sucking action. The more your baby drinks, the greater the vacuum becomes and suction gets more difficult. Thus, your baby will need to recover between sucking and will take large puffs of air that can cause colic. Apart from the risk of colic, if the pleasure of sucking becomes an effort some babies may refuse to drink.

An anti-colic valve allows air to be returned to the bottle and facilitate suction (the small bubbles rising to the surface of the liquid are indicators of air intake).

The texture of the nipple, its flow rate which is adaptable for each age, its ergonomic shape and especially the presence of an anti-colic valve are all combined parameters which ensure that your baby will effortlessly latch on to our bottle. Because of its shape and texture, Le Biberon Français offers you an ideal nipple to supplement, or replace, breastfeeding.

**Our nipples are 100% pure silicone which provides them such comfort in the mouth of your baby. You can adapt them on the 3 different bottles. The 360 ml-13 Oz is provided with a reduction ring for that purpose.**

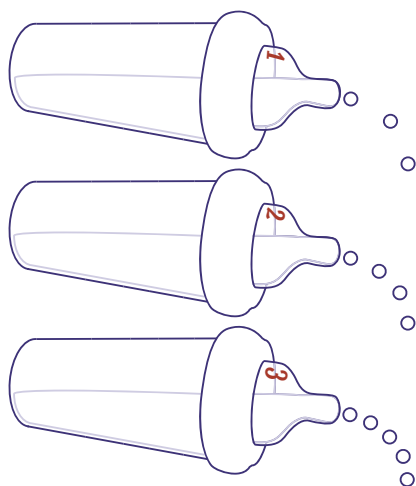

# One Nipple 3 Speed

*The nipple marked S (0m+) is suitable from the birth until 6 months old, and the nipple marked M (6m+) is suitable for children over 6 months.*

*Our nipples are all with 3 speeds with different flows.*

The shape of the nipple's slit has been specifically designed to allow different flow rates depending on the orientation of the nipple.

When the number 1 is facing upwards, the flow will be slow. If you see the 2 on top, the flow will be average, and the flow is fastest when the number 3 is in view. So all you have to do is turn our bottle to get the flow required.

*All our nipples are compatible  
with all our feeding bottles.*

## LE PEIGNE BAMBIN

Like a caress, the Toddler comb detangles and styles the fine or thick hair of the little ones. Its fine and flexible teeth respect the scalp and also allow you to gently peel off cradle cap on the skin of infants.

**Matter:**

Sustainable material: recycled plastic based on plant fibers from French miscanthus.

## LA BROSSE BÉBÉ

Ideal for daily use, this brush is suitable for baby's soft and fine hair. Its hair, in pure silk, is very supple for gentle styling and massage of the scalp to stimulate blood circulation and hair growth.

**Matter:**

Handle in red beech wood from co-managed French forests and goat silk
